Creative frontend engineer > 10+ years experience, including 8 at Visma on accounting SaaS for the nordic markets. Focused on UI modernization, design systems and ux, bridging design and development with a background in architecture. Works with React, Next.js, TypeScript and Figma, and uses agentic tools like Claude Code. Builds motion and 3D work with GSAP, Three.js and WebGL.

core skills

- product-focus, eye for design, strong ux skills
- agentic coding : claude code copilot
- core web vitals optimization, performance profiling
- design-systems, scalable custom components
- experience with migrations and UI modernization
- .net mvc, C#, jquery, ajax libraries, photoshop
- next.js react angular, typescript
- SSR SSG app router, webhooks
- GSAP motion lenis three.js webGL
- git figma sanity headless cms
- resend, analytics, maps

complementary > fluent english cross-disciplinary fast learner

experience > 2018 – present > Visma Romania > frontend engineer

- built complex, data-dense UI for an accounting SaaS serving 40k active users in the nordic markets: configurable dashboards, reversible multi-step wizards, dynamic grids, live updates over SignalR
- focused on frontend and UI, improved structure, consistency and UX by refactoring, discussing design, and by enforcing constraints and confirmed patterns
- developed an ajax library to modernize the existing .net app into a custom SPA, cutting navigation time from 4s to 1s
- led ui modernization effort to refactor, remodel UX, and adopt design system
- coordinated junior devs by knowledge sharing, code-reviews, effort estimation
- led refactoring and migration strategies to centralize components, reducing frontend code by ~40% and improving DX
- collaborated with the UX team, participated in UX research, user testing and interviews, this shared effort raised NPS by 30 points over 2 years
- complemented the design effort with ui prototypes and technical feedback
- complemented AI development by setting up skills, .md instructions and documenting existing confirmed patterns
- git .NET Core claude code javascript ajax figma signalR snowplow AppInsights cypress

`2020 – present` > `independent work` > `creative frontend engineer`

- designed, developed and manages www.casedeschise.ro for a yearly architecture open-house event: `2 cities`, `3 editions`, `30% audience growth` each year. Project features custom design, polished `sanity` cms, `QR`-based and quota-driven registration flows, maps, custom analytics, all built on `next.js`, with `SSG` and webhook-driven cache revalidation to stay within the free `sanity` plan on event peaks
- ongoing concept for a `dev-design tool` randomize studio : adobe-like panel that turns the DOM into a design canvas, exposing direct control over fonts, textures, color, images and layout
- concept for educational game for young learners clasa-zero : with `next.js` `sanity` `zustand`
- motion demos with live controls used to fine-tune animations together with designers
- for more work around `creative coding` `motion` `UI design` `three.js` `ux` see portfolio

- `next.js` `react` `angular` `vue` `typescript` `gsap` `motion` `sanity` `sass` `tailwind` `resend` `google maps` `three.js` `webGL` `GLSL` `lenis`

`2014 – 2018` > `Mi-Pay Sibiu` > `frontend developer`

- enhanced web applications by integrating new features and improving performance
- designed and built an in-house `white-label` micro-payment product: one structure across devices and clients, with client branding handled by themed media. Shipped for `O2 Germany`, `Tesco`, `3Roi` and `FooCall`, shortening delivery cycles and lowering operational overhead
- modernized existing products by migrating to `SPA` using ajax libraries.
- migrated an internal customer-support tool to `Angular`

- `jquery` `ajax` `angular` `.net mvc` `photoshop`

`education` > `2007 – 2013` > `University of Architecture, Cluj-Napoca` > `bachelor's degree`

- trained in `cross-disciplinary` workflows, `concept-to-detail` process, human-centered design
- `fast prototyping` with presenting, defending and iterating on work
- solid experience with professional 3d tools: `ArchiCAD` `AutoCAD` `3ds Max`
